Date of Birth: 3 May 1998 | Nationality: Ghanaian

PROFESSIONAL SUMMARY

Software engineer, product builder, and Management Information Systems graduate with 3+ years designing and shipping full-stack web and mobile applications across e-commerce, FoodTech, and AI-powered software. Proficient in JavaScript/TypeScript, Python, R, SQL, React, React Native, and native mobile development, with additional strengths in data analysis and project management (MSc, Merit). Experienced owning products end to end — engineering, operations, supply chain, and delivery.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, R, SQL, Swift, Kotlin
Frontend: React
Mobile: React Native, Swift (iOS), Kotlin (Android)
Backend & APIs: Node.js
Databases: Supabase, Firebase
Cloud & DevOps: AWS, Azure, Google Cloud Platform
E-commerce: Shopify, WooCommerce, custom builds
AI: AI agent development, LLM integration
Delivery: Agile / Scrum, MS Project

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer Jan 2023 – Present
CollegeMart & Vexon Tech — Accra, Ghana / Remote

Founded CollegeMart and later Vexon Tech, delivering a portfolio of web and mobile products across e-commerce, food, and education — owning design, development, deployment, and operations.

Semestra — AI Student Productivity Companion (Web & Mobile)

- Conceived, designed, and built Semestra end to end: a cross-platform AI companion that helps students plan their semester and maximise productivity.
- Engineered autonomous AI agents to run market research and marketing outreach, integrating LLM-based workflows into the product.
- Shipped a single React Native codebase serving both web and mobile; the initial release reached 100+ downloads.

Tech: React Native, TypeScript, AI / LLM agents, Supabase / Firebase

CollegeMart Central — Student E-commerce Platform (US & UK)

- Founded and built a Shopify storefront offering discounted products to students across the US and UK, handling the full store build and customization.
- Managed the end-to-end supply chain — sourcing, inventory, and fulfilment — alongside the technical build, sustaining roughly 200–300 orders per month.

Tech: Shopify (Liquid), payment & checkout integration

Jara Foods — Food Pre-ordering Platform (Aberdeen, UK)

- Designed and built a custom full-stack web application enabling the African community in Aberdeen to pre-order bulk and made-to-order meals.
- Ran daily operations, managing two kitchen staff and coordinating delivery personnel, fulfilling close to 600 orders.

Tech: Custom full-stack build (JavaScript / Node.js)

Glamorra — Global Jewellery E-commerce (Ready-made & Custom)

- Built a global Shopify storefront selling ready-made and custom gold and silver jewellery across a wide catalogue, serving around 500 customers worldwide and supporting bespoke orders and international delivery.
- Managed international sourcing and supply chain for the jewellery catalogue.

Tech: Shopify

Chestnut Alley — UK Discount Marketplace

- Developed a WooCommerce marketplace offering discounted products to UK customers, owning both the technical build and supply-chain operations.

Tech: WordPress, WooCommerce (PHP)

Project Controller

Jul 2022 – Sep 2022

EnQuest PLC — Aberdeen, United Kingdom

- Supported project controls within a team delivering an oil & gas project, contributing to cost and schedule tracking, progress reporting, and project documentation.

Document Controller

Oct 2021 – Dec 2021

Aberdeen City Council — Aberdeen, United Kingdom

- Managed and controlled project documentation — maintaining registers, version control, and distribution — while being mentored in core project management practices.

EDUCATION

MSc, Project Management

Robert Gordon University, Aberdeen, United Kingdom | Merit | 2022

BSc, Management Information Systems

Ashesi University, Ghana | 2020
